

Excluded software

Here is a list of software which is excluded from GeekosDAW along with the reasoning for it, which can be either:

1. **Legal:** openSUSE repositories must contain software released under [OSI-compliant licenses](#) ([source](#))
2. **Technical:** we don't ship software based on *obsolete* technologies like OpenSoundSystem and we try to avoid *legacy* plugin technologies such as DSSI, LADSPA and VST2 (unless they are used by FLOSS plugins of critical importance and LV2 or VST3 versions of them are unavailable)

Name	Rationale
Laborejo suite	Nonfree data files (source: tarball)
Tektracker (ttrk)	Uses OSS raw MIDI devices
VCV Rack	Nonfree data files (source)
